Bangla

Experience

July 2020 - Jan 2021

Nion Enterprise | Kushtia, Bangladesh

Full Stack Developer

- Work with the manager for analyze requirements
- Design websites based on client's requirements
- Design front-end
- Develop database
- Develop back-end
- Deployment

Project

Online Bookshop with Laravel

Online Bookshop with Laravel: A web application that allows users to browse, buy, and review books from various categories and authors. Implemented with Laravel 5.8, Bootstrap 4, JavaScript, jQuery, MySQL, Stripe payment, and Laravel ShoppingCart. Managed user authentication, authorization, orders, payments, and reviews. Used database seeder and middleware route group for data generation and access control.

HTML | Bootstrap | PHP | Laravel | Blade | MySQL

Student Attendance Management System

A PHP-based web application for managing and tracking student attendance. Developed with PHP, MySQL, JavaScript, CSS/SCSS, and HTML. Implemented role-based access control for Admin, Teacher, and Student panels. Enabled administrators to manage users and records, teachers to mark and filter attendance, and students to view attendance history. Designed with a responsive, SCSS-styled interface, secure authentication, and password recovery features to improve efficiency and reduce manual recordkeeping.

HTML | Bootstrap | PHP | Laravel | Blade | MySQL
